

Integrated Sexual and Reproductive health (ISRH) E-learning course

This E-module is designed by UNFPA to provide orientation on issues related to integrated SRH services. UNFPA India provides technical assistance to the Government of India in improving the access to quality and rights based sexual and reproductive health services. Recognising the need to develop online and flexible learning alternatives to reach a wider audience, UNFPA has developed this set of e-modules to provide orientation to primary care providers and managers on issues related to integrated SRH services, and which include the following:

- Introduction to ISRH
- Family Planning
- Safe Abortion
- Reproductive Rights
- Maternal Health - Recommendations on Evidence based Antenatal and Postpartum Care

These modules contain latest and updated evidence based information on the above SRH issues and will help to address important technical and programmatic facets on these issues. This is a self-directed learning tool, the learner can undertake it at their own pace, as per their time availability, beyond a training room setting. The main audience for these e-modules are service providers and programme managers at primary health care level.

The Indian Nursing Council encourages all the nurses, midwives and nursing students to update their knowledge on sexual and reproductive health by undergoing this e-learning module.

Duration : 7h 30m

Authors : United Nations Population Fund (UNFPA) India

CNE Hours awarded: 7.5 hours / 1.5 Credits

The E-learning module can be accessed through the link given below:

Disclaimer

This set of e-modules are meant to provide a brief orientation on the SRH issues from the public health perspective, however, they do not replace the specific detailed technical training on these issues, which is essential for a service provider to deliver clinical services on these issues. The guidelines referred to in this set of e-modules are based on technical guidance documents of Government of India, WHO and other expert agencies. All reasonable precautions have been taken to verify the information contained in this publication. However, the responsibility for the interpretation and use of the material lies with the user.
