

INC accredited CNE course on Care for the Elderly

Background

In India, population aged 60 years and above is expected to rise from 10.5% to 20.8%. Many are experiencing chronic diseases and disabilities, necessitating increased person-centred health care and healthy ageing.

Nurses play a central and multifaceted role in elderly care, serving as health professionals and as advocates, educators for a holistic care. Training nurses will overcome the unmet needs of Elderly care. It will open professional opportunities, across a spectrum of institutions including hospitals, care homes and home-based services.

Health and Beyond Consultants (HAB), Delhi & Jodhpur School of Public Health (JSPH), is implementing this online CNE course on Care for the Elderly. This is an INC accredited Continuing Nurse Education.

Objectives of this course:

To equip nurses with the knowledge and skills to deliver compassionate, evidence-based person-centred care for elderly across diverse settings.
